

CNN reranking preserves BACE1 and $\alpha 7$ binding modes—but not FYN

Each thin line is one Vina search. Circles show the Vina rank-1 pose; diamonds show the pose selected by CNNscore. Large symbols mark group means.

BACE1: GNINA retained Vina rank 1 in 6/6 runs. $\alpha 7$: GNINA selected rank 2, but all poses remained < 2 Å. FYN is a transparent scoring-method disagreement.
